Latest technology - now also in chrome
For breathtaking effects

The chrome marker ideally complements the metallic marker series from Schneider - the ink is even more intense, luminous and opaque than anything previously available!

Versatile in its applications
From hand lettering to upcycling

The design possibilities are endless - hand lettering, bullet journaling, greeting cards, upcycling furniture - with the special markers, many new possibilities arise! The best results are achieved on non-absorbent surfaces and special paper for metallic inks.

Consistent appearance
For a harmonised result

The new ink enables a homogeneous image - the pigments reflect the light evenly and thus produce a homogeneous surface.

Real mirror effect
For reflections in the designed surface

Which creative ideas do you express with the Paint-It? Post your pictures with our hashtag #makersline and you might be featured on our channel!
